3V Hexagon LED Panel Kit

Learn soldering with expandable hexagonal LED panels that support 3V LEDs for creating custom illuminated designs.

SKU	UPDATED	PRICE
KIT02243P	2024-08-09 02:15:06	$3.20(Excl. VAT)

Overview

The 3V Hexagon LED Panel Kit is designed for beginners to learn soldering and create custom LED designs. The hexagonal panels support 3V LEDs (green, blue, purple, white) and can be interconnected to form larger patterns, powered by two AA batteries or an LED driver.

Key Features

3V Hexagon LED panel kit is designed for the abecedarian to learn how to solder and also for who want to make colorful LED design.

It is easy to solder various LED figures on the panel such as heart, square and whatever you imagine. You just need to connect the power to the panel after soldering the LEDs on it, it will light and show the figure.
One Panel is not enough? We also have **3V LED panel** as Expansion pack, Just think about what you want to build.

Features

- The kit supports the LED which the rated voltage is 3V like green, blue, purple or white LED. It is different from the 2V Hexagon LED kit.
- Both two AA battery and LED Drive can power the LED panel.
- The LED panel is hexagon, which is easy for you to connect serveral panels together to make a big LED figure, even a football.
- Soldering two LEDs between two LED panel can connect them firmly.
