Overview

The Talking Breathalyzer (Assembled) is an open-source, customizable breathalyzer that audibly announces estimated blood alcohol content and can be personalized with user-supplied LCD text and MP3 audio files. When tethered to a PC, it unlocks additional entertainment features such as character animations, Breathalyzer Tweets, text-to-speech, weather/stock readouts, and a Photobooth mode, and is designed for amusement purposes only.

Key Features

A customizable Breathalyzer that talks and tells you how much you've had to drink. It's also open source and can easily be modified with your own text on the LCD screen and audio MP3 files.

When tethered to a PC with a USB cable, it has **additional features** including character animations, Breathalyzer Tweets, text to speech, weather and stock read-outs, and a Photobooth feature.

The Talking Breathalyzer is not a professional Breathalyzer and should be used for Amusement Purposes Only.

Talking Breathalyzer Features:

- Open Source
- Portable and PC/USB Tethered Modes
- Customizable Breathalyzer Audio Responses with user supplied MP3s
- Breathalyzer Tweets (PC Mode)
- Weather and Stock Performance Readouts (PC Mode)
- Photobooth Mode (PC Mode)

After receiving the Talking Breathalyzer, please download the software from
