Subject **Full Certification for Quectel EM06-E Communication Module**

Dear Quectel Team,

Deutsche Telekom issues a **full certification** for your **EM06-E** communication module:

Concept Class	Multimode (4G/3G) M2M module
Deutsche Telekom (DT) Certification Date	12.02.2020
DT Responsible Entity / Contact	ITS-IVA / Kamil Teodorczuk
Certified Deutsche Telekom Affiliates*	AT, CZ, DE, GR, HR, HU, ME, MK, NL, PL, RO, SK*
OEM Firmware Version	EM06ELAR03A08M4G
Chipset Make / Model	Qualcomm / MDM9240

* Please refer to the OEM Certification Report for Deutsche Telekom Affiliate Country Codes

Detailed conditions for this full certification are listed below. This topic should be addressed in the next maintenance release by OEM manufacturer. For more details, please refer to Section V of the Module Certification Report.

- Priority 2-Medium / 3-Low module-specific minor severity issues related to DT group radio protocol requirements adaptation.

Deutsche Telekom will consider this product to be suitable for IoT projects having large volumes, as there is already support for the no-harm to network / communication efficiency feature GSMA TS.34 Radio Policy Manager, however RPM still requires some fine tuning which will happen in the next maintenance release (as stated by Quectel).

Note:
EM06-E is VoLTE capable, however VoLTE is out of scope of following certification. In case specific demand – it will require additional effort to certify VoLTE functionality.

Kind regards,
Deutsche Telekom AG

Teodorczuk
