Package Contents

- ODYSSEY - X86J4105
- User Manual
- International Power Adapter
- SATA Cable
- Antenna x2
- RTC Battery
- Heat Sink (Assembled) (Included in EMMC version)
- Cooling Fan (Assembled) (Included in EMMC version)
## Specifications

| **Processor**  | Intel® Celeron® J4105  
Frequency: 1.5 – 2.5GHz |
| **Coprocessor**| Microchip® ATSAMD21G18  
32-Bit Arm® Cortex® M0+ |
| **Graphics**   | Intel® UHD Graphics 600  
Frequency: 250 – 750MHz |
| **Memory**     | LPDDR4 8GB |
| **Storage**    | 64GB eMMC V5.1 |
| **Wireless**   | Wi-Fi 802.11 a/b/g/n/ac @ 2.4/5 GHz HT160  
Bluetooth® 5.0 |
| **Networking** | Intel® I211AT PCIe Gigabit LAN |
| **Audio**      | Microphone + headphone Combo Connector |
| **Headers**    | 28-pin header from SAMD21G18  
40-pin header compatible with Raspberry Pi |

| **USB**         | USB 2.0 Type-A x2  
                 | USB 3.1 Type-A x1  
                 | USB 3.1 Type-C x1 |
| **Video Interfaces** | HDMI2.0a: Up to 4096x2160 @ 60Hz 24bpp  
                            | DP1.2a: Up to 4096x2160 @ 60Hz 24bpp |
| **Expansion Slots** | M.2 (Key B, 2242/2280): SATA III, USB2.0, UIM  
                            | M.2 (Key M, 2242/2280): PCIe 2.0 ×4  
                            | Micro SD card Socket  
                            | SIM Card Socket  
                            | SATA III |
| **RTC**         | JST 1.0 CR2032 3V |
| **TPM**         | Built-in TPM (2.0) |
| **Power**       | DC Jack 5.5/2.1mm or Type-C PD  
                            | DC Jack input: 12-19V DC  
                            | Type-C input: USB PD |
| **Dimensions**  | 110x110mm |
| **Certifications** | FCC, CE |
Quick Start with ODYSSEY - X86J4105

Before you Start

1. An external monitor
2. A keyboard and a mouse
3. An HDMI Cable
Attaching External Storage

If you have bought the 64GB EMMC storage version of the ODYSSEY - X86J4105, you can skip this step. However, if you need more storage for your needs, feel free to follow this step.

There are four methods of adding storage to ODYSSEY - X86J4105:

1. Through M.2 PCIE Connector
2. Through M.2 SATA connector
3. Through SATA Connector
4. Through Micro SD Card Slot

Note: Only three storage types support to install an operating system inside (M.2 SATA, M.2 PCIE, and SATA), and the Micro SD Card can only be used as external storage.
Connecting Antennas

Insert the two antennas into the two sockets on the ODYSSEY - X86J4105

Note: One antenna is for Wi-Fi and Bluetooth whereas the second antenna is for strong 5G connectivity

Connecting to a display

1. There are two ways to connect your ODYSSEY - X86J4105 to an external display

**Method 1**

![HDMI connection diagram]

**Method 2**

![Type-C connection diagram]
Connecting to a keyboard and a mouse

Connect your favorite keyboard and mouse to the ODYSSEY - X86J4105 through any of the USB connectors
Powering up

1. There are two ways to power up your ODYSSEY - X86J4105.

**Method 1**
Use the 12V/2A power adapter (provided)

**Method 2**
Use a USB Type-C Cable (Supports DP)
2. Press the power button and you will notice the blue power LED turn on.

3. Wait a few seconds until it boots into the operating system.

Welcome to ODYSSEY-X86J4105
Installing an Operating System

ODYSSEY - X86J4105 supports both Windows and Linux operating systems. If you have bought the non EMMC version, you could attach an external storage by following the previous steps and install your desired operating system by creating a bootable USB drive. Also, if you have bought the EMMC version with windows pre-installed, you could additionally install Linux according to your requirements.

Step 1

Connect your bootable USB drive into one of the USB ports on the ODYSSEY - X86J4105.
**Step 2**
Press the power button and keep pressing F7 key on the keyboard until you see the Boot Manager screen.

**Step 3**
Select the connected USB Drive as the boot drive and press enter

Then follow the instructions on the installation screen to complete installing your desired operating system.
Adding 4G Cellular Connectivity

Step 1
Insert a standard SIM Card to the bottom layer of the slot.

Step 2
Insert a PCIE 4G module.

Note: This module is a must have if you want to use the connected SIM card.
